W10-P1: Create HomeLayout_24 for all routes

The screenshot shows a development setup with two code editors and a browser window.

- Code Editors:**
 - Left editor: App_24.jsx (using Vite + React)
 - Right editor: HomeLayout_24.jsx (using Vite + React)
- Terminal:** Shows the command: `下午7:53:21 [vite] hmr update /src/App_24.js`
- Browser:** Shows a blog page titled "iClass" at `localhost:5173/demoGetBlog_24`. The page displays 8 blog posts in a grid format, each with a thumbnail, title, category (LIFESTYLE or TRAVEL), and a "Read More" button.

The screenshot shows a development setup with two code editors and a browser window.

- Code Editors:**
 - Left editor: HomeLayout_24.jsx (using Vite + React)
 - Right editor: App_24.jsx (using Vite + React)
- Terminal:** Shows the command: `下午5:12:14 [vite] hmr update /src/pages/HomeLayout_24.jsx (x3)`
- Browser:** Shows a blog page titled "Homelayout" at `localhost:5173/mid1blog_24`. The page displays 8 blog posts in a grid format, each with a thumbnail, title, category (LIFESTYLE or TRAVEL), and a "Read More" button.

W10-P2: Add Navbar_24 with 3 menu items

The screenshot shows the VS Code interface with several files open:

- client_24 > src > App_24.jsx U**: Contains imports for `QueryClient` and `QueryClientProvider` from `@tanstack/react-query` and `ReactQueryDevtools` from `@tanstack/react-query-devtools`.
- client_24 > src > Navbar_24.jsx U**: Contains imports for `HomeLayout_24` and `HomePage_24` from `./pages` and `Mid1SupaBlog_24` and `Mid2NodeBlog_24` from `./pages/mid1_24` and `Mid2Blog_24` from `./pages/demo_xx/SupaGetBlog_24` respectively.
- client_24 > src > HomeLayout_24.jsx U**: Contains code for the `HomeLayout_24` component which takes `props` and returns a `HomeLayout_24` component.
- JS Navbar_24.js U**: Contains the implementation of the `Navbar_24` component, which wraps the `Nav` component from `styled-components`.
- JS Navbar_24.jsx U**: Contains the implementation of the `Navbar_24` component, which uses the `Wrapper` component from `assets/wrappers`.

Terminal output:

```
下午8:55:03 [vite] hr update /src/pages/HomeLayout_24.jsx
```

File Explorer:

```
D:\1122\w10_mid21_24>
```

The screenshot shows the VS Code interface with several files open:

- client_24 > src > components > Navbar_24.jsx U**: Contains the implementation of the `Navbar_24` component, which includes a mega-menu structure with multiple levels of sub-navigation.
- client_24 > src > HomeLayout_24.jsx U**: Contains the implementation of the `HomeLayout_24` component, which includes links to `/Blog` and `/Contact`.
- client_24 > src > App_24.jsx U**: Contains the main application component.

Terminal output:

```
下午9:10:45 [vite] hr update /src /components/Navbar_24.jsx (x3)
```

File Explorer:

```
D:\1122\w10_mid21_24>
```

Browser Preview (localhost:5173/demoGetBlog_24):

The browser shows a blog page with a header featuring the logo and navigation links: HOME, MEGA MENU +, SERVICES +, BLOG, and CONTACT. The main content area displays a sidebar with "demo : SupaGetBlog_24" and two menu items: "mid1" and "mid2". Below the sidebar are four blog card snippets, each with a thumbnail, title, and a "Read More" button.

W10-P3: Get all blogs using route /mid1Blog_24 (自行完成)
